Agenda No. 2 To acknowledge the Company's Annual Report and the Board of Directors' Report on the Company's operational results for 2013.

Board's opinion: The operational results were satisfactory.

The Executive Vice Chairman invited Mr. Aswin Techajareonvikul, the Chief Executive Officer and President, presented the Board of Directors' Report on the Company's operations for 2013.

The Chief Executive Officer and President introduced the Management Board and reported to the Meeting regarding Berli Jucker Public Company Limited and its subsidiaries' operations, the significant activities for the 2013 financial year and the 2013 results as follows:

The year 2013 was a year of upheavals and change. Thai economy had a good start for the 1st two quarters with rising private and government expenditures. The 2nd half of 2013 was a completely different story with elevating political tensions and contracting consumer spending. BJC's performance also reflected well with what happened in Thai macro economy overall.

As we looked back to our achievements in 2013, we were proud of how we executed strategies to transform ourselves from a Thai conglomerate into a regional distribution powerhouse. In February 2013, we finished the acquisition of Ichiban, a leading food manufacturer in Vietnam. In March 2013, we consummated our acquisition of Thai An, Vietnam's leading distributor, wholesaler, and retailer. Thai An and Thai Corp, which we acquired in 2012, enabled BJC to be one of Vietnam's largest distribution company with the widest coverage network of more than 200,000 points throughout Vietnam.

On a manufacturing front, we were proud to be South East Asia's largest glass bottle manufacturer and Thailand's largest aluminium can maker. In 2013 our glass manufacturing capacity reached more than 3,460 tons per day across all our production bases in Thailand, Malaysia and Vietnam. In April 2013, we started up our 2nd glass furnace at our Saraburi plant with a capacity of 300 tons per day, whereas we retired two of our glass furnace at Rajburana, which had total capacity of 200 tons per day. Our Rajburana was our oldest glass plant and resided in an area now considered city. Manufacturing costs there were relatively higher because of shortage of natural gas supply and lower efficiency. In June 2013, we also expanded our aluminium can line capacity by adding 400 million cans and 730 million ends per year, solidifying our position as Thailand's largest can manufacturer and supplier with more than 2,200 million cans per year and more than 2,700 million ends per year, while our total aluminum can capacity accounted for more than 3,000 million cans per year across our production bases in Thailand and Vietnam. We continued to strive for manufacturing excellence. In September 2013, our aluminium can plant in Vietnam reached a breakeven in terms of profitability within 15 months since our startup.

2013 was also a year that BJC started our own food and pharmaceutical retailers. In June 2013, we opened our first Ogenki store, which was our first drug and health store in Bangkok, and reached 8 stores by the year end 2013. "Ogenki" was derived from "Ogenki desu-ka?" which meant "Are you well?" in Japanese. With more expansion in 2013 and the years to come, Ogenki store would allow us to distribute more of our consumer and healthcare products under our private and house brands. We also set up for the first time

our convenience store brands in Vietnam and Laos. Stores under our B's mart brand in Vietnam and under our brand Mpoint in Laos were among the top three players there. We finished 2013 with 73 book retail stores, 8 healthcare stores, and almost 90 stores of convenience stores in Vietnam and Laos.

This year we again set another record in our corporate history. Despite all economic-political challenges, we managed to increase our sales by 13% from 2012 to reach 42,226 million baht and our net profit was increased to 2,426 million baht. Our sales outside Thailand also reached another record high of 19.1% of our total sales, with Vietnam accounting for the highest portion.

We would like to take this opportunity to express our sincere appreciation to our shareholders, customers, investors, business partners and more than 10,000 employees for continued support of our company.

The Chief Executive Officer and President gave the shareholders an opportunity to further inquire about the Company's Annual Report and the Board of Directors' Report on the Company's operational results for 2013.

Mr. Siriwat Worawetwuthikun spoke to the shareholders' meeting whether the TCC group of companies' purchase of the stocks of Fraser and Neave Company Limited ("F&N") had increased the Company's sale volume of more than Baht 5,000 million, how the company would expand its business into Asean Economic Community (AEC) in the future, and whether the Company's sale volume would hit Baht 50,000 million or not.

The Chief Executive Officer and President replied that taking over F&N business was his business expansion strategy to expand the Company's business in South East Asia, BJC's core strategy. In addition, before BJC took over F&N, BJC had done business with F&N too. The first was its purchase of glass factories in Vietnam, Malaysia, and Thailand. In terms of packaging, F&N had both glass bottles and aluminum cans. All companies are public companies which went through audit committee and every relevant organization.

Mr. Siriwat Worawetwuthikun spoke to the shareholders' meeting that for the benefits of the shareholders attending the meeting on the day. AEC is starting in 2015 but the Chairman's strategy was to purchase F&N business in the beginning of 2013 because BJC is a company of TCC group, so it should benefit from the strategy. Therefore, he asked if BJC's sale volume in 2014 or 2015 should increase by Baht 50,000 million or not.

The Chief Executive Officer and President replied that the current economic situation was a challenge and the year 2014 was a great challenge. BJC is trying to make its sale volume grow by double digits. BJC will still be operating at its full capacity, and if it is supported by the shareholders, it will achieve its goals faster.

The Chief Executive Officer and President thanked Mr. Siriwat for supporting the management and the shareholders. He added that F&N is a big group and needs a large sum

of investment; thus, it needs to be careful not to go into debt. BJC thus cannot be allowed to do direct investment as BJC's investment must be under the principle where BJC must not make too much debt and the investment must generate income and profits for shareholders, and so Thai Beverage Public Company Limited ("Thaibev") and companies in TCC group are investors. Mr. Charoen Sirivadhanabhakdi needs to be engaged to supervise, assist, study how to do business, and retain competent personnel. BJC is determined to expand its business in ASEAN because it is experienced in doing glass factory and snack businesses.

Mr. Suvit Laohaponwatana asked the shareholders' meeting about many issues related to the annual report, as follows:

1. Page 172 – Executive board

The Executive Board consists of 9 people. He is not certain if Mr. Suvarn Valaisathien, no. 5, is still in the Executive Board and still in the Board of Directors or not.

The Chief Executive Officer and President explained that Mr. Suvarn Valaisathien is only the Executive Board but he is not the Board of Directors due to his commitment.

2. Page 16 – Vital financial information for 5 years

	%	% growth	
	<u>2013</u>	<u>2013</u>	<u>2012</u>
Gross profit margin	23.91	(0.9)	(2.4)
Net income	5.75	(10.9)	(5.8)
Return on total assets	5.45	(13.6)	(2.6)
Return on average net shareholders' equity	17.03	(7.3)	2.9

Please explain growth number and 2014 trend.

The Chief Executive Officer and President explained that growth percentage in 2013 was calculated from growth percentage in 2013 minus by growth percentage in 2012 and divided by growth percentage in 2012. The percentage comparison shows that the percentage in 2013 decreased. While for the trend of 2014, he is looking the numbers in the first quarter. There are fluctuations of production raw materials such as palm oil, sugar, and powdered milk, cullet, sand and soda ash, etc. Currently, the situation is being assessed, so if the figure of the second quarter is seen, it is easier use the trend of the 2nd figures to better explain the 2014 trend.

3. Page 25 – Financial Status: Total assets of Company and its subsidiaries

- 3.1 The deferred tax asset is Baht 579 million, increased Baht 84 million or 17.0%, mainly from increasing deferred tax assets of losses carried forward from businesses which just started operation during the year.

The question is what the new businesses are, when the deferred tax will be over, and how the trend will be.

The Chief Executive Officer and President invited Mr. Supakit Assavachai, Vice President – Finance and Accounting Division - Technical Supply Chain and International Business Group to answer shareholders' questions.

Mr. Supakit Assavachai, Vice President – Finance and Accounting Division - Technical Supply Chain and International Business Group clarified that most deferred tax belonged to BOI business, of which its initial investment was at a loss, which is different between accounting and tax perspectives because BOI was about 5-8 years. So, this will be recovered in later years.

- 3.2 Goodwill 3,271 million baht, increased Baht 1,526 million from business acquisitions abroad. The question is how the goodwill was derived.

Mr. Supakit Assavachai, Vice President – Finance and Accounting Division - Technical Supply Chain and International Business Group clarified that goodwill was calculated from the difference between take over and current net book value (the value used to calculate discounted cash flow to find out how much it is currently). This will turn the future profit.

4. Page 26 – Financial Status: Shareholders' equity of Company and its subsidiaries

- 4.1 An increase in acquisition of non-controlling interests with no-change in control of Baht 255 million and from business acquisitions abroad of Baht 57 million. Please explain what non-controlling interests are.

The Chief Executive Officer and President said that in case BJC invests overseas, it has local minor shareholders as partners to provide it with knowledge on rules and regulations to minimize local risks called non-controlling interests or minority interest.

Mr. Supakit Assavachai, Vice President – Finance and Accounting Division - Technical Supply Chain and International Business Group clarified that the amount Baht 255 million came from joint venture's increase in capital, causing BJC to increase its capital, making minority interest on the rise too. The amount Baht 57 million was derived from BJC's takeover of foreign companies, making their minority interest rise.

4.2 The decrease from changing in ownership interest in a subsidiary of Baht 109 million. Please explain why and what the names of the subsidiaries are.

Mr. Supakit Assavachai, Vice President – Finance and Accounting Division - Technical Supply Chain and International Business Group clarified that BJC holds 65% shares in Phu Thai Group and holds 51% shares in Thai An Trading Vietnam. Phu Thai purchased the rest 49% of the shares back. Hence, the ratio of shareholders decreased by 109 million baht from transfer amount.

The Executive Vice Chairman said that each shareholder should not spend more than 5 minutes following the previous year's meeting practice. Nevertheless, if any shareholders have any further questions, they can ask Mr. Supakit after the meeting in order not impact other shareholders' time.

As there was no shareholder expressing any additional opinion, the Executive Vice Chairman addressed to the meeting that, because this agenda was an acknowledgment one, there would not be any resolution to be passed.

After consideration, the Meeting acknowledged the Company's Annual Report and the Board of Directors' Report on the Company's operational results for 2013 as proposed by the Chief Executive Officer and President.

Agenda No. 3 To consider and approve the Company's Financial Statement Position and Statement of Comprehensive Income for the year ended 31 December 2013.

Board's opinion: The Financial Statement Position and Statement of Comprehensive Income for the year ended 31 December 2013 were duly audited by the Auditor and considered by the Audit Committee and the Board of Directors. The Shareholders should approve the Financial Statement Position and Statement of Comprehensive Income for the year ended 31 December 2013.

The Executive Vice Chairman proposed to the Meeting, for consideration, the Financial Statement Position and Statement of Comprehensive Income for the year ended 31 December 2013, the Board of Directors consider that the Financial Statement Position and Statement of Comprehensive Income were duly audited by the Auditor. Thus, the Shareholders should approve the Financial Statement Position and Statement of Comprehensive Income for the year ended 31 December 2013. These were stated in the financial statement pages 1-159. Therefore Mr. Aswin Techajareonvikul, the Chief Executive Officer and President was invited to report the significant information.

The Chief Executive Officer and President reported to the Meeting that the Financial Statement Position represented an increase of total assets of 16.3 percent from the year 2012, the total liabilities increased by 22 percent compared with the year 2012. From the Statement of Comprehensive Income, the total revenues of Baht 42,226 million, an increase

of 12.8 percent from 2012 and the net profit was Baht 2,426 million, an increase of 0.5 percent from 2012.

The Executive Vice Chairman gave the shareholders an opportunity to further inquire about the Financial Statement Position and Statement of Comprehensive Income for the year ended 31 December 2013.

Ms. Jinpak Pornpiboon asked about the financial statement in the statements of comprehensive income on pages 4-5, asking for additional explanation for the following 3 issues:

1. Other incomes dropping by about Baht 24 million compared to that in 2012. What are those incomes and the causes of the decrease?
2. The financial cost in 2013 increased by Baht 72 million compared to that of 2012. What was the cause of the increase? Please explain in details.
3. The profits from minority interest.

Mr. Supakit Assavachai, Vice President – Finance and Accounting Division - Technical Supply Chain and International Business Group responded to the three questions:

1. Other incomes decreased as a result of the decrease in commission income and sales scrap
 - 1.1 Commission income dropped while sale volume increased. BJC is a commercial business. If it doesn't receive income from sale volume, it does from commission income.
 - 1.2 Sales scrap income dropped because there was none in 2013, but there will be 2014.
2. Financial cost increased because there were more loans to expand factories, increase productivity, and purchase corporate shares for investment Baht 3,000 million.
3. BJC had high profits but shareholding did not reach 100% (about 51%). Thus, when there was minority interest, BJC gained partial profits from businesses BJC was not the only shareholder (more than 51% approximately).

There was no other business, the Executive Vice Chairman proposed the Meeting to approve the Company's Financial Statements for the year ended 31 December 2013 comprised of Statement of Financial Position and Statement of Comprehensive Income which had been audited and certified by the auditors.

Agenda No. 10 To consider other business (if any).

The Chairman invited shareholders to ask questions and comment.

Mr. Somwang Poonsombat asked that sale volume in 2013 increased but the dividend and earnings per share did not increase in accordance with sale volume.

The Chief Executive Officer and President explained that in the previous year the business which increased sale volume were new businesses in other countries, most of which were product distribution business. These businesses:

- 1) May not be the same as BJC's own production, causing profits non-aligned with sales volume.
- 2) Foreign investment means there are foreign investors. BJC, however, is a major shareholder, enabling it to combine sale volume by 100% while profits can be combined in accordance with investment ratio.

Both factors make profit ratio not grow with sale volume. However, the business BJC purchased would yield profits in the long run.

Ms. Nara Sripet, a representative of Thai Investors Association, asked how the future direction of BJC would be. There was also a question from the association whether BJC would be interested to sign in the association's anti-corruption project.

The Chief Executive Officer and President answered that the future direction of the Company is to build product distribution network in this region because Thailand is situated in the middle of the 10 countries in ASEAN. Now he wanted to build a wider distribution network to have a complete linkage in terms of production, sale, and retailed product distribution during the 3-4 years in Vietnam. This showed we had done part of it. In terms of production, we had glass, aluminum can, and tissue factories in upstream business. In middle stream, we had product distribution network in Northern and Southern Vietnam. In downstream, we had product distribution channels, which are retailed convenience stores. What we want to see next is a more linkage in Vietnam, Laos, Cambodia, Thailand, and Myanmar, operated under the vision of the Chairman- Mr. Charoen to expand business in this region.

As for anti-corruption policy, the Company's policy was to join anti-corruption network and will act against all kinds of corruption. The Company conducted business risk assessment and has code of conduct to prevent, control, and follow up the potential corruption risks.

Ms. Jinpak Pornpiboon proposed to the meeting that the Company should have incentives for its long shareholders who are value investors. Hence, if the Company has BJC-Value Shareholder Stock Option Program (BJC-VSSOP), which was like a lot of small bamboo stems together, it will create uniqueness for the Company.

The Chief Executive Officer and President thanked for all good suggestions and expressed his good feeling to see everyone's bond with the Company. For the project, the Chief Executive Officer and President would come up with the plan.

Mr. Siriwat Worawetwuthikun spoke to the meeting that he had held shares for long and he supported BJC's Directors and Executives because since the Chairman began holding shares and managed the Company without receiving any remuneration for 5 years, BJC's had a 100% increase in sale volume, from Baht 22,000 million to Baht 42,000 million, and its net profit increased from Baht 1,200 million to Baht 2,400 million. He also spoke for only 5 minutes as he had proposed last time.

The Chief Executive Officer and President thanked Mr. Siriwat.

Mr. Boonrak Skulsathaporn asked the meeting how the Company views innovation, what the Executives think if the Company pays more attention to innovation, and what it has to do with innovation.

The Chief Executive Officer and President responded to the meeting's questions that the Company is aware of the importance of innovations which in its view is about products, that

is, how to keep improving products; about how to work, that is, how to keep improving work, and about sale channel, that is, increasing new channels to keep selling products.

Therefore, the Company's view of innovation is product innovation, process innovation, and channel innovation. In addition, the Company stressed the importance of innovation by building bodies of knowledge. For instance, Thai Glass Industry Company Limited (TGI) set up Thai Glass Technology Company Limited to provide knowledge of glass production; it also brought machines acknowledged by its partner Owens-Illinois Inc. (O-I), the world's biggest glass bottle producer. O-I has sent its staff to visit TGI too. Moreover, the process of making potato chip starts from growing potatoes, conducting research with Australia to find out how to grow potatoes in places where they cannot grow. The potato matter is one of the innovations. The Company also finds new way to work such as investing in SAP system for more systematic work and finding new channels, which is direct sale to home door. The direct sale method has been used with a yoghurt product under the brand "Activia".

When there was no other matters presented to the meeting. The Chairman thanked the shareholders for their valuable time to share their ideas which were beneficial to the Company again and closed the meeting at 17.00 p.m.
